

Commodity Accounting

Reap the benefits of a unified system to simplify operations, reduce manual effort, and enhance decision making.

Levridge Commodity Accounting is built on Microsoft Dynamics 365, an integrated system which handles financials, general ledger, accounts receivables, account payables, inventory management, process manufacturing, transportation management, and asset maintenance.

Commodity Accounting extends this functionality to support ag-specific accounting needs including commodity contracts, scale tickets, settlements, splits, deferred payments, offers, and risk management.

Cloud-based solution to solve the unique accounting challenges of Commodity Processors, Grain Elevators, and Ag Retail Operations.

Purchase Contracts
Experience one unified system to manage bid sheets, grower offers, purchase contracts and commodity deliveries.

Inventory Management
Track costs and quantities of your commodity inventory from raw materials to finished products and byproducts.

Settlements
Utilize an integrated wizard to settle contracts and issue payments taking into account advances, liens, fees, discounts, premiums, and splits. **Can do on-demand or batch.**

Risk Management
Minimize risk and keep on top of market volatility through management of futures and options, hedging, DPR, and mark-to-market accounting.

Sales Contracts
Complete contracts with ease - pricing, terms of pricing and delivery, freight adjustments, and delivery periods - all the information you need at your fingertips.

Real-Time Reporting
Access daily position reports (DPR) and long/short position reports to manage risk and maintain inventory.
