

# Transforming Milling with Advanced Software Solutions

**Levridge Commodity Accounting is a cloud-based solution specifically developed to solve the unique accounting challenges of milling companies**

## **End-to-End Visibility**

Track each step from raw grain intake to finished product, ensuring transparency and quality control through the milling process

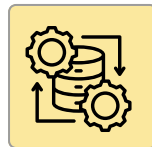

## **Enhanced Efficiency**

Automated processes streamline settlements, contracts, scale tickets and load orders.

## **Increased Productivity**

Customizable workflows adapted to your specific milling needs, reduced manual data errors and operational delays.

## **Integrated Operations Management**

Contracts, deliveries, settlements automatically updated in ERP for faster payments and real-time inventory, and risk visibility.

## **Improved Relationships**

Seamlessly track orders, shipments, deliveries, settlements and use built-in AI features for improved customer insights.

## **Powered by:**

Microsoft  
Dynamics 365
