

Ag Sales

Reap the benefits of a unified system to simplify operations, reduce manual effort, and enhance decision making.

Levridge Ag Sales is built on Microsoft Dynamics 365, an integrated system which handles financials, sales orders, invoicing, general ledger, accounts receivables, account payables, inventory management, process manufacturing, transportation management, and asset maintenance.

Ag Sales extends this functionality to support ag-specific accounting needs including billing splits, prepayments, discounts, restricted sales, returns, credits, and rebilling.

Cloud-based solution to solve the unique accounting challenges of Agriculture Retail Operations.

Billing

Adapt to client requests with ease for split billing, credit, and rebilling changes.

Payments

Apply automatic or manual prepayments to items, item groups, or billing splits, even foreign currency transactions.

Pricing

Provide discounts based on volume thresholds or payment methods and set up seed zone pricing.

Reporting

Generate financial reports across multiple locations, regions, commodities, and vendors easily through an intuitive interface.

Integrations

Integrate with best of breed agronomy, and energy solutions, automation equipment, and business to business transaction exchanges.

Inventory

Manage inventory from purchasing, location-to-location transfers, shipping, and sales invoices. Track your costing and lot numbers all from one solution.
